

▲ Hydro Consulting Offices, fire detection system

▲ Circular Head Trade Training Centre, fire detection system

JMG's Fire Services Team provides design and advisory services to clients in commercial property, industry, municipal, institutional, recreational, healthcare and many other market sectors.

We offer skills and expertise in fire detection and warning systems, sprinkler protection systems, fire suppression systems, VESDA & EWIS systems, smoke exhaust and smoke zone control systems, stairwell pressurisation and statutory emergency evacuation plans.

JMG also provide a suite of services to help building owners in compliance with the General Fire Regulations 2010 and Australian Standard AS3745 including - emergency evacuation diagrams, emergency response procedures, emergency planning documentation, log keeping and training.

We have worked with architects and directly with clients for over 40 years to deliver fire detection and suppression systems to many significant industrial and commercial sites including:

- > Hydro Consulting - fire detection system;
- > Circular Head Training Centre - fire detection system;
- > Launceston General Hospital - sprinkler and detection systems;
- > Blundstone warehouse, Glenorchy - high hazard sprinkler and detection systems plus integrated racking sprinkler systems;
- > Transend data centre - gas suppression system;
- > Roseberry Mines - site fire mains infrastructure;
- > Auspine Scottsdale - site fire mains and pump set.
