

▲ Typical commercial hot water solar panels

▲ Bellerive Oval, site stormwater design

▲ Hydro Consulting Offices, 5 Green Star rated building, site stormwater design

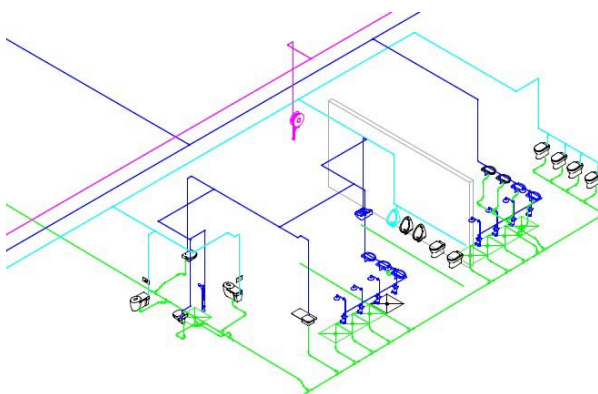

JMG's Hydraulics Team provides design and advisory services to clients in commercial property, industry, municipal, institutional, recreational, healthcare and many other market sectors.

We offer skills and expertise in the traditional areas of hot & cold water, sanitary drainage, sewer and stormwater and wastewater design.

We also offer specialist expertise in related areas such as water sensitive urban design, rainwater harvesting, greywater and blackwater systems, syphonic roof drainage and self-contained sewerage treatment systems, wastewater treatment systems, solar heat pumps and natural gas hot water systems.

We have worked with architects and directly with clients for over 40 years to deliver hydraulics solutions to many of Tasmania's significant buildings and development sites including:

- > Northgate Shopping Centre;
- > Australian Taxation Office;
- > Royal Hobart Hospital;
- > Bellerive Oval;
- > ANZ Centre;
- > Cambridge Park;
- > Hydro Consulting;
- > Devonport Aquatic Centre;
- > Derwent Entertainment Centre.
